

MADHAV KABRA

SENIOR FRONTEND DEVELOPER (6 Years)

AIR 1916 — GATE (CSE) 2019

[Linkedin](#) • [Portfolio](#) • madhav.kabra1100@gmail.com

SKILLS

Frontend

React.js

Next.js

HTML, CSS

Tailwind CSS

Typescript

Radix UI, Schadcn,
Material UI, Ant Design

Rest API

Vite, webpack

Sonar cloud

Local storage

Session storage

Design system and
tokens

Auth0, Clerk.dev

React libraries

Redux, Toolkit, Thunk,
Saga, Zustand

Axios, Fetch

Highcharts, Ag charts,
Recharts, Devextreme
datagrid, Ag-grid

Eslint, Prettier, Airbnb

Products

- AI Chat bots (Biotechnology DNA RNA predictions, AI Travel planner)
- AI Widgets (Chat bots, Search widgets)
- B2B Saas Products (Healthcare product, AI customer support, HR management system, Recruitment System, CMS)
- B2C Saas Products (Content Monetization platform, Freelancer marketplace, Digital event management, Dental tooth Charting)
- Chrome Extensions
- Gmail Plugins
- Outlook Add-ins

Links to Work

- Content Monetization Platform (YC funded) (tagmango.com)
- Landing Page (<https://gqty.dev/>)
- Freelancer Marketplace (<https://shoutt.co/>)
- Dental Healthcare App (dechea.com)

EXPERIENCES

Senior Frontend Developer | Talent500

Bangalore, India (June 2022 - Present)

- Led frontend development of a B2B product with 1500 UI screens with a team of 6 members.
- Created reusable UI component library that can be reused across multiple products to reduce their initial development and bootstrap time.
- Proactively identified and rectified pre-production UX gaps, including loaders, permissions, and slow APIs, ensuring a smoother user experience at product launch.
- Developed filters which can be generated using simple configurations with zero code change.
- Peer code reviews to improve and maintain overall code quality.

Testing

Browser automation testing using Cypress, Playwright and chromium drivers

Unit testing — Jest, React testing-library, enzyme, vitest, code coverage setup

Tools

Git – GitHub, Bitbucket, Gitlab

Jira, Kanban board, Trello and Confluence

Figma, Figjam

Postman

Database

FaunaDB

MongoDb

Firebase

Firestore

Prisma

Architectures

Micro-frontends

Monolithic frontends

Component driven architecture

EDUCATION

Bachelor of Technology in Information Technology (8 CGPA) Jan 2015 – Jan 2019

Medi-Caps Institute of Technology and Management, Indore, Madhya Pradesh, India

Frontend Developer | Dechea GmbH

Kempten, Germany (Nov 2020 – May 2022)

- Researched new tools and technologies that fastned development process. Ex. Bit.dev (Component driven architecture), Figjam (team brainstorming), Zipy.ai (User Journey Optimization, Session Recordings)
- Revolutionized product development with Feature Slice Design: clear business logic, discoverable architecture, adaptable components, easy refactoring, and explicit code reuse, minimizing disruptions.
- Achieved a clean code coverage of ~90%.
- Collaborated closely with product owner and scrum master to refine the requirement, process backlog and sprint planning

Solution Engineer | Deqode

Indore, India (Jan 2019 – Oct 2020)

- Provide training to the interns on JS / React.js and its libraries.
- Convert the Figma designs into the actual UI.
- Implemented local storage solutions for seamless data persistence and enhanced user experience.

Projects

Frontend Developer | HashiCorp

San Francisco, California, United States (Freelance)

- Automate lint fixes post commit using hooks.
- Improved code quality by removal of code duplication and smells using Sonar cloud.
- Integrated zoom-sdk to allow pre-planned zoom sessions.

Full stack developer | Tagmango

Mumbai, India

- Renovated UI of the app using Ant design.
- Handle the production bugs related to database and frontend.
- Integrated events from Google analytics to measure user actions and improvise user experience.
